Technology is our middle name. As an IT solutions provider, we invest our resources into solutions that meet our customers unique business requirements. We are focused your most valuable asset…information. Our solutions and services help you store, protect and manage those assets wherever they are…on premise, in the cloud, or both.

Applied Technology Services has been a trusted partner to government and education customers ***for twenty years.*** We provide a wide array of solutions, professional and managed services from the data center to the desktop.

ATS is a small, women-owned business certified as a Minority Business in Maryland, Virginia, Pennsylvania, Delaware, the District of Columbia and for Federal business through the WBENC. We are proof that **small** companies can do **BIG** things**.** Our size allows us focus and versatility that is harder to find in larger companies. It keeps us aligned to our mission of providing excellent value and superior customer service.

Located just outside of Baltimore, Maryland we are ideally located to service customers throughout the Mid-Atlantic region.

Enterprise Modernization
We assist our customers with modernizing aging infrastructure to a digital future whether that is on-premise, hybrid or in the cloud. This is not a cookie-cutter approach. We evaluate your applications and data (block, file and object), your unique requirements and design solutions with you that work for you.

Infrastructure Services
From consultation and design to implementation and migration, we provide peace of mind. ATS architects and engineer are well-rounded experts that stay up to date on industry best practices, known issues and OEM policies bringing our expertise to your environment to ensure your success.

Cyber Security Solutions
Whether you need assistance to design or implement solutions to protect your applications, email, data or endpoints, ATS has you covered. We offer assessments, managed security services and a breadth of solutions to assist customers with their defense in depth strategy.

Workforce Transformation
ATS provides end-to-end solutions, starting with your computing requirements and application workloads. We offer bundled solutions for unified endpoint management that allow you to access enterprise applications and data anywhere, anytime, using one or more devices.

End User Computing
ATS provides flexible procurement and deployment options for its customers and full life cycle deployment services. From imaging to implementation and the logistics between, we help you get your client devices up and running as well as supporting in and out-of-warranty maintenance.

IT Staffing
We have successful, repeatable processes for candidate screening, job matching and resource onboarding. We also offer program management capabilities in every engagement - this includes defined processes for contract, staffing, performance management and quality assurance.
