Accenture Security Offerings

Comprehensive and industry-tailored security solutions and services

Cyber Industry

Embed security to build cyber resilience and mitigate cyber risk across critical areas of each industry's value chain.

Cyber-Physical Security

Protect operational reliability and integrity by securing industrial control systems, process control systems and connected products at all stages of the lifecycle, from product engineering to quickly detecting and responding to threats.

- Operational Technology Security
- Product Security

Financial Services

Efficiently manage regulatory compliance and improve trust with customers by enabling secure digital transactions.

- Cyber Resilience
- Security of Payments
- Trusted Services
- Cyber Insurance

Health & Public Service

Secure organizations' infrastructure and the connected devices providing public services and patient care.

- Secure Medical Records & Devices
- Secure Defense & National Security
- Citizen Digital Identity and Trusted Services

Resources

Secure digital transformation and operations to transition to sustainability with focus on resilience, safety, and intellectual property.

- Secure Critical Infrastructures
- Operational Technology Security
- Grid Protection

Products

Protect customer trust by securing the evolution of product manufacturing and development companies.

- Digital Trust & eCommerce Security
- Secure Supply Chain and Ecosystem
- Cyber Resilient Plants

Comms, Media & Technology

Secure the technology platforms and communications networks on which the global economy runs.

- Telco Customer Protection
- Software Product Security
- 5G, Device and Hardware Security

Cyber Strategy

Protect value and accelerate transformation by aligning cyber risk strategies with business priorities.

C-Suite & Board Cyber Advisory

Enable cyber risk oversight and accountability to protect business value.

- Cyber Education & Governance
- Tabletop & Crisis Management Strategy
- Cybersecurity Board Metrics

Cyber Risk & Regulatory

Adhere to laws, regulations & risk tolerances across the enterprise and third parties.

- Geopolitical Cyber Risk Advisory
- Supply Chain Security
- IT Governance, Risk & Compliance (GRC)
- Data Privacy Assessment, Design & Compliance
- Cyber Risk & Compliance As-a-Service

Security Strategy & Organization

Accelerate secure enterprise growth through strategy, organization and culture.

- Security Assessment, Design & Control Testing
- Security Workforce, Culture & Organization
- Secure Business, Product, and Technology Transformation
- Security Strategy & Organization As-a-Service

Cyber Protection

Protect the business as it transforms – applying zero trust principles to secure the entire digital core.

Cloud Security

Secure the digital foundation and embed security at every stage of the lifecycle to protect applications, workloads, containers & every cloud type.

- Cloud Security Advisory & Architecture
- Secure Cloud Migration
- Secure Cloud Modernization
- Managed Cloud Security

Cyber Mesh, Zero Trust & SASE

Develop & implement a strategy and architecture connecting network, data, identity and infrastructure for constant and seamless verification.

- Zero Trust Center of Excellence
- Cloud & Network Security Strategy & Architecture
- Secure Network Modernization
- Edge Security
- Cloud & Network Managed Security Services

Identity & Access Management

Efficiently manage enterprise and privileged access, modernize capabilities and automate provisioning at scale.

- I&AM Modernization
- Identity Governance & Administration
- Access Management
- Privileged Access Management
- Cloud Infrastructure Entitlement

Application Security

Secure applications end-to-end, from ideation through requirements, design, build, test, deploy and operate.

- Application Testing
- DAST
- SAST
- DevSecOps
- Managed Application Security
- Automated Remediation

Enterprise Platform Security

Protect core enterprise and intelligent platform services by hardening environments and improving monitoring, security testing, access controls, governance, risk & compliance.

- Platform Security Strategy & Governance
- Platform Access Controls
- Platform Vulnerability Management

Data & AI Security

Drive trust & integrity by implementing, optimizing & operating security capabilities for data transformations, including data discovery, classification, and protection.

- Data Security Advisory & Architecture
- Data Discovery & Classification
- Data Protection
- Encryption & Key Management
- Trust Solutions
- Managed Data & AI Security

Metaverse & Emerging Technology Security

Ensure technologies of the global economy's next generation are secure, resilient and sustainable now and as they evolve.

- Secure Metaverse & Web3
- Quantum Cryptography
- Space & Science Technology

Cyber Resilience

Pressure test defences, understand emerging threats and prepare and respond quickly to attacks.

Cyber Attack Simulation

Simulate attacks to evaluate the effectiveness of security controls and test processes and capabilities to be better prepared to defend against potential adversaries.

- Attack Surface Management
- Penetration Testing
- Red & Purple Teaming
- Cyber Simulations
- Threat Hunting
- Insider Risk

Detection & Response

Design, build and run Security Operations at scale to monitor your enterprise value chain, proactively search for risk and threats and promptly respond to minimize the business impact.

- Security Analytics & Automation
- Managed Threat Operations
- Managed Extended Detection and Response (MxDR)

Crisis & Incident Response

Rapidly respond end-to-end to cyber events to reduce risk, minimize business disruption and accelerate recovery.

- Crisis Management
- Incident Response
- Forensics & Investigation

Threat Intelligence

Data-led, industry relevant intelligence delivered via multi-disciplinary analytic services to reduce and mitigate business risks.

- Industry Intelligence
- Business Intelligence by Design
- Value-Chain Threat Assessments and Services
