Collective Intelligence

Deliver More Value in Less Time Using Low-Code Tools

Streamline Business Processes and Workflows

Empower everyone in your organization with an intuitive, collaborative, and extensible platform of low-code tools.

Microsoft
Power Platform + PowerBI

The Microsoft Power Platform is a low-code platform that allows businesses to build custom apps, automate processes, and analyze data, all without requiring extensive coding knowledge. Power BI is a business analytics tool that helps organizations visualize and analyze data to make informed decisions.

With Collective Intelligence, your business can access a team of experienced professionals who can help you implement and customize Microsoft Power Platform and Power BI to meet your specific needs. Using these tools, your business can streamline and automate various processes, such as sales, marketing, and customer service, to name a few while reducing costs and improving customer satisfaction.

Additionally, Collective Intelligence can provide training and support to help your employees learn how to use the Power Platform and Power BI effectively, ensuring that you get the most out of these tools. Working with Collective Intelligence as a Microsoft partner can help your business drive operational excellence and improve its bottom line through the use of the Power Platform and Power BI.

Power Apps
App Development

Power Automate
Process Automation

Power Virtual Agents
App Development

Power Pages
External-Facing Websites

Data Connectors

AI Builder

Dataverse

We specialize in configuring, developing, and maintaining Power Platform solutions that save you time, money, and the hassle.

With our help, you'll accelerate automating business and customer workflows, making life easier for your staff and customers, train your team on best practices, enable citizen development, and engage with customers quickly through chatbots and other automated event responses.

Some ways we help:

Implementation
We automate your workflows, connect silo's of your organization, and improve communication.

Security Assessments
We ensure no data will leak out of your organization or process.

Licensing Review
Are you leveraging the most cost effective license for your use cases?

Data Analytics
Ask about our Level-Up Power BI for more ways we help.

Conversions
We migrate from legacy tools so you can consolidate on one technology stack.
