

**Projects are the single most important tool for accomplishing goals, creating change and improving operations – Mathtech helps organizations create projects that are well-defined and designed for success.**

### **Strategic Planning & Blueprinting**

Expertly facilitating a Vision for technology and operational transformation.

### **System Modernization Planning & Support**

Preparing for the support that must be committed during and after implementation.

### **Customer Experience & Journey Mapping**

Stepping into your customers' shoes to understand how you can improve.

### **Organizational Change**

Uncovering and managing the inevitable reactions to new technologies and operations.

### **Project Management & IV&V**

Establishing the structure that orchestrates people, tasks and deliverables for success.

### **RFP & Procurement Support**

Creating the playbook for a project that is well-defined and designed for manageability.

### **Quality Assurance & Testing**

Objectively analyzing and testing solutions to ensure they meet your true business needs.

### **Data Analysis & Modernization**

Agile evaluation and maintenance of the lifeblood of an organization.
