

# Ethernet Dedicated Internet Service

COMCAST  
BUSINESS

Comcast Business Ethernet Dedicated Internet (EDI) Service is a simple, reliable and more flexible option to traditional private line dedicated Internet access services, providing higher bandwidth and increased efficiencies.

Ethernet Dedicated Internet provides an Ethernet Virtual Connection (EVC) from the customer premises location to a Comcast Internet Point of Presence (POP) router. Our Ethernet interface enables compatibility with your LAN.

For enterprises that need the most bandwidth and the fastest connection providing a continuous link between their existing LAN and the public Internet, there is no better way to connect than with Comcast Business Ethernet Dedicated Internet.

Ethernet Dedicated Internet is offered in 10Mbps/100Mbps, 1Gbps, 10Gbps and 100Gbps Ethernet User Network Interface (UNI) in speed increments from 1Mbps to 100Gbps subject to available capacity.
