# IT MODERNIZATION

Your digital transformation starts with SAIC

We're transforming computing, app deployment, and decision-making through IT modernization. Integrating cloud, software, and analytics, we can speed the use of apps, accelerate migration to the cloud, and unlock the power of advanced analytics to create the future of IT.

SAIC is the IT modernization leader, harnessing 50 years of experience on the front lines of government missions to envision what's next and what's needed. We'll help you get ready today for what's next tomorrow. No matter where you are on your digital transformation journey, we can help you get where you want to be.

SAIC®

Driving customer outcomes

DEPARTMENT OF DEFENSE

We're unlocking the power of speed, scale, and security for the DOD — migrating 800 mission applications into the cloud for the U.S. Air Force and U.S. Army through the Cloud One contract. Now, they can build, run, and operate cloud-native apps and access cloud services — providing updated capabilities faster, more frequently, and at a fraction of legacy cost.

DEPARTMENT OF AGRICULTURE

We're helping the USDA shrink its IT footprint and streamline services for citizen customers. Agricultural producers are now able to spend less time on insurance reporting for crops and can get insured faster. Virtualization of data centers to a private cloud is also leading to lower infrastructure and operational costs.

FOOD AND DRUG ADMINISTRATION

We're helping power critical insights for public health, supporting 2,400 high performance computing (HPC) workstations and thousands of scientists and researchers with the FDA. Ensuring scientific computing environments run securely and efficiently enables critical insights and advanced oversight of the nation's food safety.

PATENT AND TRADEMARK OFFICE

We're easing the burden of patent registration and approval through application modernization and cloud migration solutions. Stabilizing and securing critical IT systems allow the USPTO to focus time and resources on supporting the ingenuity of American inventors and entrepreneurs.

MODERNIZATION IN THE FACE OF CRISIS

We are working every day to swiftly and precisely deliver impactful solutions into an ever changing landscape. During the COVID-19 crisis, we are supporting our government customers, our communities, and our employees every step of the way.

An integration approach to IT modernization — explore our new solutions

CLOUD

Digital transformation starts with cloud. Our broad capabilities and deep alliances with cloud providers are designed to help customers accelerate at every stage in their cloud journeys.

SOFTWARE

Our innovative and agile approach to software and application modernization embraces modern practices including DevSecOps and continuous integration/continuous delivery.

CYBER

Modern cyberattacks require a different security posture than traditional means — a zero trust architecture. Our solutions address all tenets of a secure ZTA-environment.

ANALYTICS

The key to solving real-world problems often lies in data. Our advanced analytics capabilities unlock the power of data for actionable insights.

OUR PARTNERS IN MODERNIZATION:
Apptio, AWS, Cisco, Dell EMC, Google Cloud, Okta, Microsoft, VMware, ServiceNow, Tableau, NetApp, Red Hat
