JUNIPER NETWORKS | Driven by Experience™

State, local, and education IT leaders:
Evolve your network with StateRAMP

AUTHORIZED StateRAMP

What is StateRAMP?

StateRAMP provides a common method to verify cloud security through independent audits and continuous monitoring. Safeguard sensitive, cloud-based data and reduce the time and resources spent on compliance by choosing StateRAMP Authorized solutions.

Juniper Mist Government Cloud:

- Is purpose-built for end-to-end AIOps

- Assures exceptional experiences for operators and end users

- Is the only StateRAMP Authorized solution with a single validation for wired, wireless, and SD-WAN

Deliver exceptional user experiences, save time, reduce costs, and be confident in cloud security with an AI-Native Networking platform.

Is each user experience important?
Juniper Mist delivers reliable, measurable, secure, and high-quality connections.

Do you want to lower network TCO?
Juniper Mist delivers **85%** lower OpEx than traditional solutions.

Would you like to stress less and do more?
Juniper Mist eliminates **90%** of network trouble tickets and **85%** of onsite support visits.

How can you accelerate sustainability goals?
Retire wireless LAN controllers and scale your network with demands.

Can your network offer a rich digital experience?
Offer engaging visitor experiences, campus navigation, and track high-value assets with Juniper Mist location services.

Want to learn more about Juniper wired, wireless, or SD-WAN?
