# Automate Security. Unleash Efficiency.

Achieve More with Our Industry-Leading, AI-Powered Cybersecurity Platforms

A Comprehensive Cybersecurity Partner for the Public Sector

Palo Alto Networks is dedicated to advancing public sector cybersecurity with innovative solutions that meet the unique challenges of federal, state, and local governments, as well as those of educational institutions. Our commitment is powered by AI-driven technology and integrated security platforms that offer unmatched protection and ensure compliance with the highest government standards.

Empower your agency with industry-leading cybersecurity that's setting a new standard for efficiency. Simplify IT operations, streamline processes, and help reduce costs—all on a foundation of unparalleled protection from Palo Alto Networks.

From	To
Fragmented Portfolio	Integrated, Best in Class
Manual Operations	Real-Time, AI-Driven Automation
Reactive	Proactive

Palo Alto Networks
Your Trusted Partner, Leading the Way in Securing Public Sector Enterprises

Technical Discovery
Conduct deep research to develop visibility into the current environment and zero trust requirements.

Challenges and Mission
Outline the customer's business problem and identify specific pain points and mission needs.

Maturity and Architecture Mapping
Perform analysis of the current environment and corresponding processes to establish the baseline architecture.

Flexible Platform Integration
Apply the environmental assessment to develop an integrated platform solution with our ecosystem partners.

Proof of Value
Validate the proposed integrated platform solution to determine value for the enterprise.
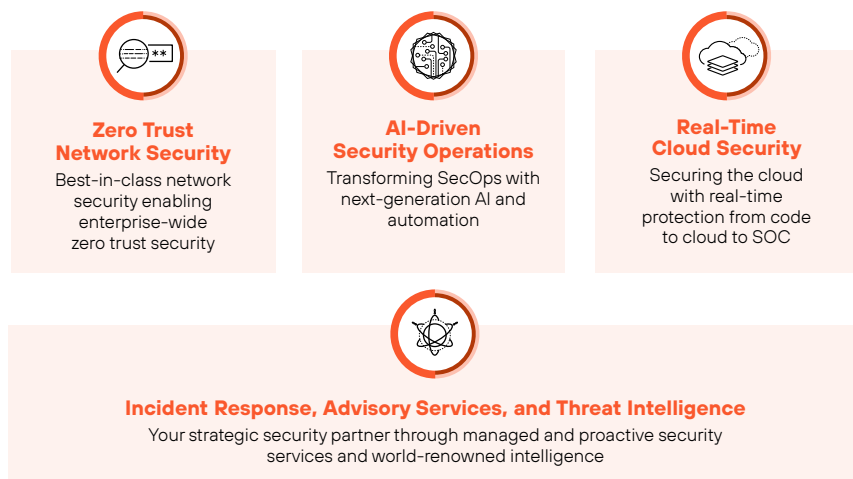

Full-Scale Rollout
Test and deploy the integrated platform solution to ensure the best fit, functionality, and overall effectiveness.

Continuous Delivery
Proactively identify improvements to the integrated zero trust platform.

Platformization That Addresses Critical Public Sector Cybersecurity Challenges Through Integration and Innovation

Our unrivaled security platforms enable you to optimize resources, reduce costs, and protect critical data. From secure cloud workloads to AI-driven threat prevention and a modern zero trust architecture, we provide the tools and expertise you need to help transform your operations with confidence.

Zero Trust Network Security
Best-in-class network security enabling enterprise-wide zero trust security

AI-Driven Security Operations
Transforming SecOps with next-generation AI and automation

Real-Time Cloud Security
Securing the cloud with real-time protection from code to cloud to SOC

Incident Response, Advisory Services, and Threat Intelligence
Your strategic security partner through managed and proactive security services and world-renowned intelligence

The Power of AI-Ready Infrastructure Through Platformization to Prepare for Tomorrow's Threats

Our integrated platforms tackle these challenges through unified workflows, ensuring seamless operations. From prevention to detection and response, our platforms cover every defense vector, sharing intelligence and collaborating to stop the most complex threats.

The benefits of using an integrated security approach include strengthened security posture, streamlined implementation, simplified IT and cybersecurity management, and lower procurement costs and time.

Embrace the agility, scalability, and cost-effectiveness of modern cybersecurity solutions while protecting your agency's digital infrastructure. Together, we can enable a more secure, responsive, and future-ready government.

Loyal to You and the Global Security Standards You Count On

Compliance by design is how Palo Alto Networks innovates at speed and scale for regulated markets. Our key solutions not only deliver powerful security but also adhere to rigorous standards. We hold FedRAMP High Authorization for over 20 solutions, demonstrating our commitment to government-grade cybersecurity. Inquire about our accreditations and how our Global Certification team supports robust public and private partnerships.
