Why Public Sector Chooses BeyondTrust

- Advanced technology that enables agencies to shift left and proactively reduce risk, shrink the attack surface and disrupt nation state or crime actors using identity-based attack techniques before the attack spreads.
- Trusted across all 50 states, all cabinet level civilian agencies and more than one hundred Department of Defense environments
- Security and compliance that hold up under scrutiny. Our platform enforces least privilege, brokers just in time access, and records every privileged session with rich context, helping agencies align with Zero Trust guidance, meet oversight expectations, and confidently answer audits and investigations.
- A partner invested in government missions. BeyondTrust brings dedicated public sector expertise, proven success with government organizations, and a roadmap shaped by modernization and resilience goals, so agencies get more than a tool set, they get a strategic ally.
