

Agencies face increasing pressure to deliver mission outcomes with tighter budgets, evolving priorities, and increased user expectations. Mathtech has guided technology modernization and operational improvement across critical public-sector missions.

We unite strategy, governance, and execution, with change management and user experience, so transformation delivers real gains in performance, workforce effectiveness, and public service.

Agency Operations & Tax Functions

Improve processes & workflows to increase efficiency, reduce backlog, and optimize mission outcomes.

Strategic Planning & Procurement

Define future-state visions, business cases, and strategies for new initiatives. Support well-defined procurements for new technologies and solutions.

Customer Experience (CX) Enhancement

Enhance how customers and stakeholders interact with the agency, reducing friction, improving digital services, and increasing successful outcomes.

Organizational Structure & Operating Model

Design roles, responsibilities, and governance structures that support efficient and sustainable operations.

Workforce Support & Transformation

Equip the workforce with the tools, training, and processes they need to operate effectively in a modern environment.

Project Management & Oversight

Provide expert management and independent oversight of technology and operational projects, ensuring alignment with business needs and contractual commitments.

Why Mathtech?

60+ Years of Experience – Expertise in high-volume, high-stakes public-sector domains.

Mission-First Process Improvement – Fixing how government works, not just how systems look on paper.

Embedded CX Discipline – Service delivery performance, workforce enablement & operational resilience.

Peer Learning – Curators of lessons-learned from across the United States.

Technology-Agnostic Service Delivery – Methodologies that adapt to your existing systems, not the other way around.

Learn how Mathtech can accelerate your agency's process and modernization journey.
